

Rollingstock - Passenger

Our manufacturing partners offer a complete range of tried and tested Passenger rolling stock available for all types of railway networks. Electric Multiple Units, Diesel Multiple Units, Metro Cross and Light Rail passenger cars are manufactured to meet the clients specific requirements. Passenger rolling stock for high speed railway systems with speeds in excess of 300 km/h are also available.

For further information please contact us.

E.M.U

Electric Multiple Unit sets can be manufactured to meet the requirements of the passenger rail operator. EMUs can be manufactured with steel or aluminium car bodies and electric drive motor and traction power can be produced to meet the requirements of the project. Our manufactures can produce EMU sets that can reach speeds in excess of 300km/h

DMU

Diesel Multiple Units can be manufactured in different configurations with both single and double deck being available. DMU sets incorporating a tilting mechanism are available to increase passenger comfort and operate at speeds up to 200km/h.
